

LEADING THE EMBEDDED FUTURE

**YOUR LEADING GLOBAL PARTNER FOR  
RELIABLE, HIGHLY SOPHISTICATED  
EMBEDDED PRODUCTS USED IN REGULATED  
CRITICAL APPLICATIONS**

# ABOUT duagon

## Your leading global partner for reliable, sophisticated embedded products used in regulated critical applications

duagon AG, a rapidly expanding Swiss technology company, is a leading supplier for communication, computing and control technology as well as project planning and development services for system critical applications in the rail, medical and critical automation market. The superior software and hardware IP creates innovative, highly reliable and safe products, enabling customers to shape and realize their technology roadmap. Moreover, customers benefit from a shorter time to market and lower total cost of ownership.

duagon – leading the embedded future.

# BUSINESS UNITS & PRODUCTS

**Business Unit NETWORK & CONTROL**

### Networking technology.

As technology leader in the field of communication solutions duagon offers the most comprehensive product portfolio for train networks using MVB, real-time Ethernet (CIP, IPTCom, TRDP, PROFINET, and more), WTB and CAN.

In addition to the wide range of communication interfaces, duagon offers gateways, repeaters, switches and diagnostic tools.

### Control and monitoring solutions.

As a leading provider of railway and transportation control, monitoring and information systems, duagon offers solutions for a range of essential subsystems, such as condition-based monitoring and maintenance, air conditioning, door control and powerpack.

Furthermore, duagon helps customers to connect devices, processes and systems through the duagon Cloud.

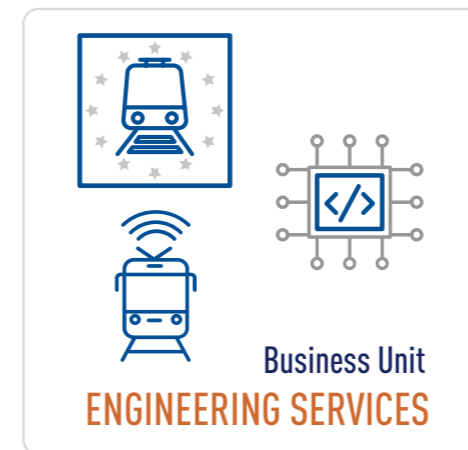

### Rugged and reliable embedded computer systems.

Focused on innovation, reliability and flexibility, duagon develops and manufactures highly reliable systems from low-power to high-performance applications.

duagon offers a robust range of embedded COTS boards and devices widely used in extreme environmental conditions found in mobile, industrial and safety-critical applications.

**Business Unit COMPUTING SYSTEMS**

**Business Unit ENGINEERING SERVICES**

### Engineering services and high-end application software development.

duagon provides engineering and R&D consulting services for rail traffic signaling and train information systems.

duagon offers cost-efficient engineering services, which reduce product development costs and project delivery times.

## duagon WORLDWIDE

duagon has a global presence with support and sales representatives across 8 countries. With three decentralized engineering and production sites, our customers take advantage of the added competence and flexibility.
