

Join our Team!

duagon AG, a rapidly expanding Swiss technology company, is a leading supplier for communication, computing and control technology as well as project planning and development services for system critical applications in the rail, medical and critical automation market. The superior software and hardware IP create innovative, highly reliable and safe products, enabling customers to shape and realize their technology roadmap.

At our site in **Nuremberg**, the focus is on research and development of all aspects of communication and control of trains and other means of transport.

For our location in **Nuremberg** we are looking for:

Working Student DevOps (f/m/d)

Your Responsibilities:

- Contributing to the optimization and further development of the software development toolchain
- Creation and maintenance of software containers
- Collaboration in the creation and implementation of development processes
- Deployment and maintenance of the development infrastructure

Your Profile:

- You are in an appropriate education in the field of computer science (HF/FH)
- You are familiar with Linux
- You have good Python and shell scripting skills
- You have gained initial experience in the use of containers and virtual machines
- You work very independently and show a high level of commitment, are a team player and have a high degree of initiative to work in a technology company
- Ideally, you have practical experience either from previous work or projects or from your actual master/bachelor studies

We offer:

- A challenging and varied job with a lot of flexibility and practical tasks
- A team-oriented work culture and innovative freedom to develop solutions and implement them independently or in small teams
- Ergonomic workstations, adjustable standing desks
- Flexible working hours
